OBJECT
Be first to move all 10 of your marbles into the star point at the opposite end of the gameboard.

CONTENTS
- 1 gameboard
- 60 Marbles (10 each of 6 colours)

GAME SET UP
1. Carefully remove the circles from the gameboard holes.

2. Choose your star point. Each player does the same. In a 2-player or 4-player game, players take opposite points. In a 3-player game, players take every other star point.

3. Take 10 marbles of the same colour and place them in the holes of your star point. All players do the same.

GAME PLAY
1. On your turn, move one of your marbles, according to the rules below. After you move, your turn is over play then continues to your left.

- Move one marble only. You may move in any direction, as long as your marble follows a black line.

- You may move to any adjacent empty hole (as shown in figure 1); or you may make one or more jumps. You cannot do both on your same turn. Rule 2 explains jumps.

2. JUMPS: Follow the rules below when you jump over another marble.

- You may jump over your own marble or over an opponent's marble

FIGURE 1

The marble shown in the centre hole can move to holes A, B, C, D, E, or F

- Never remove a marble from the gameboard after jumping it.

- Jump over one adjacent marble only, along a straight line, to land in an empty hole adjacent to it. You may jump in any direction, as long as you follow a straight line – never change direction in the middle of the jump.

- You may make several consecutive jumps on your turn, as long as you jump one marble at a time to land in an empty hole adjacent to it.

  See Figure 2 for legal jumps and Figure 3 for illegal jumps.
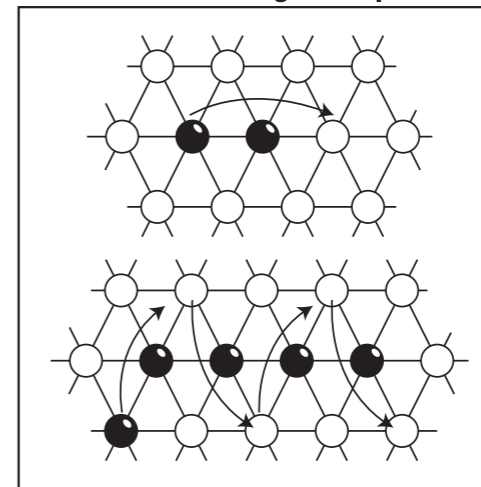

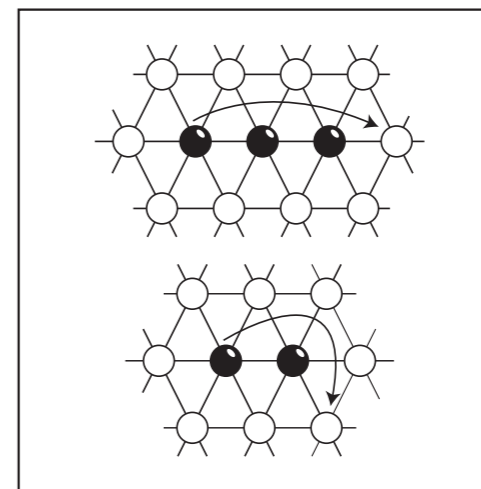

FIGURE 2: Legal Jumps

FIGURE 3: Illegal Jumps

HOW TO WIN
Be first to move each of your 10 marbles into each of the 10 holes of the opposite star point and you win the game!

GAME VARIATION
If you wish to play several games, try this method of scoring. The winner of each game receives 10 points; other players receive 1 point for each marble in their opposite star points when the game ends. At the end of the last game, the player with the highest point total wins!
