

With the Glass Painting – Nature kit, you will experience the joy of creating your very own stained glass-inspired artwork. Each element in this kit is designed to let you express your creativity and bring a touch of nature into your space. Paint on the glass-like surfaces using the vibrant colours provided and watch your artwork come to life with the stunning effects of stained glass. When you are finished, proudly display your masterpiece using the included stands.

CONTENTS

Printed Acrylic Peel
off Design Board 2 nos.
(20cm X 20cm)

Reflection Film
Sheet 2 nos.
(20cm X 20cm)

Frame
Strips
6 nos.

Display
Stand
2 nos.

Glass Paints
3 nos. (10ml each)

Back up Board 2
nos. (20cm X 20cm)

Paint Brush
1 no.

Paint palette
1 no.

NOTE:

Before starting the painting activity, keep handy the following items: (not provided with the kit) a toothpick, bowl of water, old newspapers and a waste cloth. Please cover the work surface area with sheets of old newspaper.

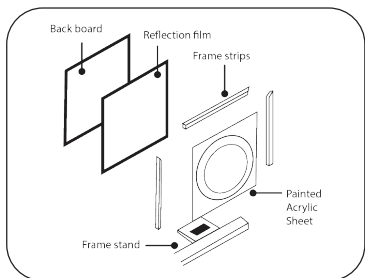

BEGIN GLASS PAINTING:

- Choose any one of the 2 printed acrylic sheets and peel off the sticker pasted on the back side of the acrylic sheet.
- Place the chosen acrylic sheet in the centre with a bowl of water, paint brush, the 3 paint bottles, palette and old waste cloth next to it.
- Each design consists of multiple areas within the design. You may choose to paint each area in a different colour. Plan out what colours you would like to paint where, in advance (See Colour Tips).

- Ensure that the side of the acrylic sheet where the design projections are present faces upwards.
- Pour your chosen paint colors into the palette grooves, being careful not to over-squeeze and spill.
- Use a small piece of waste cloth to wipe the brush when changing colours.
- Let all the brush strokes while painting be smooth, long and towards one direction at all times.
- If any bubbles are formed on the acrylic sheet while painting, prick the bubble with a tooth pick to burst the bubble and even out the surface.
- Once the acrylic sheet has been fully painted, keep it aside to dry completely.
- Always remember to close paint bottle caps when not in use to prevent drying.

AFTER PAINTING:

- Make sure that the acrylic sheet is completely dry.
- Place the reflection film sheet in-between the painted acrylic sheet and back-up board.
- Align the edges.
- Holding the 3 components together, slowly slide the frame strips onto them (top & sides) to hold all the 3 components together tightly.
- Ensure that the corners of the strips are in alignment with each other.
- Carefully place the entire assembly onto the frame stand by sliding the bottom edge of the sheets inside the slot of the stand provided (Fig.1).

(Fig. 1)

COLOUR TIPS:

- You can mix the 3 colours provided to create new colours:

50% Yellow + 50% Red = Orange

50% Blue + 50% Yellow = Green

25% Blue + 75% Red = Purple

HAPPY PAINTING!
