Finger Paints
(25ml each)
Pink & Blue

Paint palette
(1 no.)

Display frame
(1 no.)

Double side adhesive
tapes (4 nos.)

Getting started

Preparation tips:

Before you begin, gather the following items (not included in the kit):

- Bowl of water
- Wiping cloth
- Old newspapers for easy clean-up

Setting up:

- Choose Your Sheet – Start with an activity sheet to practice finger painting techniques.
- Prepare Your Workspace – Cover your table with old newspapers and arrange all materials within reach.
- Use the Paint Palette – Pour a small amount of paint in the palette and mix colours as needed.
- Diluting Paints – Add a little water for smoother application if necessary.

Finger painting: *Paint the parts of the activity sheets and design sheets that need to glow with the special 'glow in the dark' colours!*

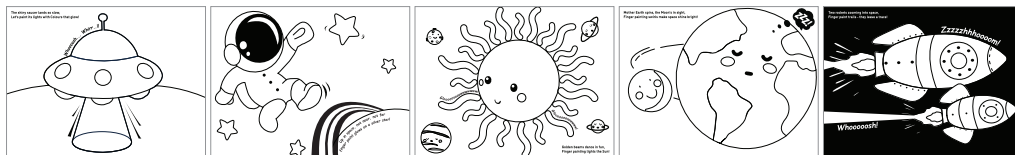

Activity sheets (Practice phase):

The first five sheets are designed to help kids practice different finger painting techniques.

Design sheets (Creative phase):

The next five sheets feature scenes from outer space for free hand finger painting. Unleash your creativity and paint them your way.

Tip: Wipe off excess paint from your finger/palm before dabbing, to create clear impressions.

Plan your colours:

- Decide which colours to use for different parts of the design.
- Use the palette to mix colours to create new shades.

Important tips for best results:

1. Always close paint lids when not in use.
2. Dip fingers in water and wipe clean before switching colours.
3. Allow the painted sheets to dry completely before handling them.

Showcasing Your Artwork:

Once your paintings are complete, display them with pride!

- Use the double sided adhesive tapes to attach the display frame to a wall.
- Place your artwork inside the frame and enjoy watching your colourful creations!
